

## **Uniq - Mobile Developer ReactNative (full-time)**

### *What we are looking for*

An experienced web and mobile developer to support the development and launch of our cross-platform mobile app for the next 3-6 months. Prior experience with at least either Android or iOS is a must. Additionally, experience with ReactNative is a big plus. We plan to build our app with ReactNative and expect you to be deeply familiar with Javascript, responsive layouts as well as building and deploying mobile apps. We also expect you to be comfortable with git and unit/integration testing. Clean code samples are expected (ideally a non-trivial ReactNative app), and a small programming task will be given before an interview.

### *What we offer*

Join a one-of-a-kind [founder team](#) as we start to build the product we have prototyped for the last 6 months. This is probably one of the most exciting phases to come onboard, as we're starting greenfield and with high momentum. We have a culture of iterating quickly, giving honest and constructive feedback and embracing modern technology. As our main mobile developer you will have a huge impact on our product, making sure tens of thousands of people get to use an app they love. We offer competitive compensation, a great work environment in Berlin, the possibility to work remotely (one day per week) and most importantly the chance to build an exciting product that helps people change their lives for the better..

### *When to start*

Early June 2017

### *Where to apply*

Please send your application to [jobs@uniq.vision](mailto:jobs@uniq.vision). We usually respond within 48 hours.
